

## International Helpers Dewan

Dear Brothers and Sisters,

Bapak established that the appointment of members to roles in Subud is based on testing. Bapak was also clear that the administration of Subud organisations must be consistent with the law of the land in which they are registered.

These laws do not generally recognise testing and so our practice must reconcile these two.

In the Subud process the voting by the delegates is not to confirm the choice of appointees, rather it is to confirm that the Subud process of appointment has been correctly followed.

That process is to accept nominations which are then tested by a dewan of male and female helpers. Those helpers then confirm the results of the testing before passing them to the committee or delegates for 'outer' confirmation.

Therefore the appointment to positions in Subud is based on surrender to God in the Latihan to receive His Guidance for the office in question, according to the example and guidance set by Bapak.
